## WORK EXPERIENCE

UI /UX INTERN JAN 2024

CODSOFT FEB 2024

During my one-month virtual internship at CodSoft from January to February 2024, I focused on UI/UX design using Figma. This experience allowed me to gain practical skills in crafting engaging digital experiences and strengthened my understanding of user-centered design principles.

WEB DEVELOPMENT INTERN JULY 2024

MEETANSHI

I have done 15 days offline summer internship at Meetanshi Technologies from 1 July 2024 to 15 July 2024 in Web Development domain where I practiced on several web development tasks as well as project

## PROFILE

Energetic and dedicated Bachelor of Engineering in Computer Engineering student at GEC Bhavnagar with a strong passion for UI/UX design, Android development, Web designing, Web Development. Proficient in design principles and tools, Java programming, and web technologies including HTML, CSS, JavaScript, PHP, MYSQL. Adept at problem-solving and committed to delivering high-quality projects. Seeking opportunities to apply skills and expand knowledge in a dynamic work environment.

## TECHNICAL PROJECTS

IRRI\_MAGIC

In my project, Irri\_Magic, I developed a smart irrigation system using IoT technology. This system automated water supply to crops based on sensor readings of temperature, soil moisture, and water levels. By integrating cloud computing, it aimed to improve water conservation in agriculture and enhance crop yield.

SAVOURCRAFT

Savourcraft is a restaurant-based website developed using technologies like HTML, CSS, and PHP, with MySQL for database connectivity. It offers features such as viewing the menu, reading the restaurant blog, booking a reservation table, and many more restaurant-related functionalities.
